SELFTRACE for Sports Clubs

Behavioral reading for performance, self-control, and cohesion under pressure.

Vertical
Sports clubs, academies, coaches, and competitive development programs

Focus
SELFTRACE for Sports Clubs

Core
Scientific + actionable

SELFTRACE helps read how athletes, coaches, or teams react to error, pressure, frustration, bench time, internal conflict, or competition. That adds a powerful mental and behavioral layer to performance and development work.

Current platform capabilities

- Identity cartography by life areas with history and cumulative reading.
- Identity biography and emotional state to go deeper than the core pattern.
- Holistic diagnosis, contextual behavioral summary, and structured prompts for external AI.
- Apply as case workshop, historical inventory, and dedicated file card.
- Reusable libraries of actors, contexts, and environments to enrich real cases.
- Reports, PDFs, and shareable outputs with host branding.
- Link-based sharing and curated outputs for private or carefully public contexts.

What makes this valuable

- Micro-scenarios that translate sports pressure into observable choices.
- Pattern, cost, and alternative readout in practical language.
- Can track behavioral evolution across rounds and stages.

Use cases

- Mental training, sports leadership, and pressure regulation.
- Youth academies, development squads, and competitive maturation.
- Prevention of self-sabotage, overload, or locker-room friction.

Relevant benefits for this sector

- Better self-control and a sharper read on error, frustration, and pressure.
- Greater precision when working on leadership, discipline, and cohesion.
- An attractive format for athletes who reject overly theoretical tools.

Sharing notes

- Fits naturally in clubs, academies, high performance, and formative sports.
- Can be used as a complement to mental coaching or integral performance work.
- Very valuable wherever behavior under pressure defines results.

Scientific and operational basis

SELFTRACE combines deterministic pattern reading grounded in psychological flexibility, traits, and attachment theory. External AI can expand language, reflection, or coaching; the core detection still relies on reproducible rules and now also translates into cross-cutting reports and applied case files.

Invite them to explore SELFTRACE

Share this brochure with people, teams, or institutions who may find it useful. SELFTRACE combines cartography, biography, emotional state, contextual behavioral summary, applied case files, shareable reports, and external AI support inside a deep and actionable experience.
